Hence I am ready for giving my voice and listening towards intelligence by using my creativity, consistency & Innovativeness while contributing overall growth to organization recongnizing and gaining knowledge with expereincing the distint ways.

WORK EXPERIENCE

Intern

- Gained experience in web Application in various technology including the working of "JSP (Servers & Servlets)".
- Understanding customer requirement and getting my hands on Spring framework. Also connection framework through JDBC (java+mysql)

Dec 2022 - Feb 2023

PROJECTS

ASK LAMA

team Member

- This application will leverage artificial intelligence and creative storytelling to simulate interactions with knowledgeable and wise 'masters' that might be entirely fictional or some real life entities which we couldn't get a hold of and offer valuable responses.
- The objective of such a chat application would be to create an immersive and enriching experience that goes beyond conventional information retrieval, blending technology, creativity, and storytelling to offer users a new way of interacting with knowledge and wisdom

CAMPUSPLACEMENTPLATFORM

team Lead

- This is an application for training and placement cell in higher education institutions allowing them to conduct campus placement more conveniently & easily by automating the process of data entry and cleaning, optionally, by performing resume shortlisting by login through user gmail.

UNIQUE HOME STUDIO

Personal Project

- The objective is to use a multifaceted approach to simplify and streamline the process of finding and renting homes. The platform aims to achieve this by offering the experience for both renters and property owners from payment process to call and chat communication.
